Do not eat, drink or smoke when using this product.

Keep/Store away from food, drink and animal feeding stuffs.

Read label before use.

Keep out of reach of children.

If medical advice is needed have product container or label at hand.

Storage and Disposal

In some circumstances, it may be necessary to remove dead rodents and unused bait as described in the 'Storage and Disposal' section.

For professional use only.

Difenacoum is an anticoagulant which may produce bleeding; the onset of bleeding may be delayed for several days after exposure. If there is no active bleeding the INR (prothrombin time) should be measured on presentation and 48-72 hours after exposure. If the INR is greater than 4, administer Vitamin K1 (orally or intravenously) may be required for several weeks. The advice of the National Poisons Information Service (www.npis.org) should be sought, particularly if a patient is in hospital or if anticoagulant therapy is required.

In case of a pet emergency contact your vet immediately.

Bitrex is a registered Trade Mark of MacFarlan Smith, Edinburgh.

The product contains Bitrex™ to help prevent accidental human consumption.
